2015 Projected Crop Cost and Return Estimates, Roosevelt County

Causey/Lingo Area Dryland Farm

Jerry M. Hawkes, James D. Libbin and Patrick Kircher

Cost and return estimates for dryland crops in the Causey/Lingo area of Roosevelt County are presented in this report. These estimates were gathered from a panel of local producers, state and federal agency personnel, and others interested in crop production. They are estimates for a representative farm with above-average management. These estimates will not fit any particular farm and should be adjusted to match individual businesses and operating conditions.

The representative farm contains 1,280 acres. The crops grown are:

Wheat
Grain Sorghum
Cotton

Primary Information Tables

Table 1 lists an acreage summery.

Table 2 lists the basic cost assumptions for primary inputs.

Table 3 shows overhead cost information.

Table 4 lists the machinery complement for this representative farm. It also lists the hours of annual use, number, current market value and associated costs for each item. All machinery is assumed to be used; large tractor units are approximately one to seven years old; small tractor units average about 15 to 20 years of age; tillage, irrigation and miscellaneous equipment is seven years old on equipment is seven years old on average; and harvest and planting equipment and trucks were assumed to be about five years old.

Individual Crop Estimates

Tables 5 through 7 are the cost and return estimates for the individual crops. Definitions and methods are explained on the back side of this page.

Summaries

Table 8 is a side-by-side summary of the individual crop estimates. Table 9 pulls together all of the individual estimates into a whole-farm summary.

Further Explanation and Other Estimates

The final two pages of this report provide a glossary of the terms used and a few ideas about how to modify these budgets to better fit your farm.

A partial list of cost and return estimates for other associated farming situations in or near Roosevelt County include:

1. Rogers - Dora Dryland,
2. Lea County Dryland, and
3. Roosevelt County Irrigated.

Contact your County Extension Agent or an Extension Farm Management Specialist at NMSU for a complete list of available crop cost and return estimates.
