

2024 Northeast Cattle (Cow/Calf) Cost and Return Estimates

Boe Lopez, Colfax County Agricultural Agent, Pilja Vitale, Extension Economist, and Madhav Regmi, Associate Professor

Cost and return estimates for cattle production (cow/calf) in the Northeast area of New Mexico are presented in this report. These estimates were gathered from a panel of ranchers, state and federal agencies, and other input industries in cattle production. They are estimates for a representative ranch with above-average management.

The Northeast area of New Mexico encompasses all of Union, Harding, Quay, and Guadalupe counties and portions of Curry, De Baca, Torrance, Santa Fe, San Miguel, Mora, and Colfax counties.

These estimates will not fit any particular ranch and should be adjusted to match individual businesses and operating conditions. We thank those individuals who provided data to make this report complete.

The representative ranches contain medium, large, and extra-large sizes, depending on their breeding cow sizes. The numbers of breeding cows raised are:

Medium: 190

Large: 333

Extra Large: 523

Primary Information Tables

Table 1 lists the Northeast region cow/calf budget.

Table 2 lists ranch investment.

Further Explanation and Input Source Reference

Input data sources, other than ranchers and local input vendors, include:

Interest rates referred to Farm Credit of New Mexico.

Contact your County Extension Agent and Extension Economist at NMSU for a complete list of available crop cost and return estimates.
